Country Profile

Basic Facts

Country Name: Federated States of Micronesia

Demographics:

The population of Micronesia is 107,434. About 22 percent of Micronesians live in urban areas. Roughly 35 percent are 14 years of age or younger. 62 percent are between 15 and 64 years old. Only about 3 percent are 65 or older. Life expectancy for Micronesians is about 71 years, as of 2009 estimates. Life expectancy for men is 69 and for women it is about 73.

Language:

English is the official and most common language. Other languages spoken include Chuukese, Kapingamarangi, Kosrean, Nukuoro, Pohnpeian, Ulithian, Woleian, and Yapese.

Society/Culture:

While each state in the Federated States of Micronesia share some culture, each state also has particular characteristics. Yap is the most traditional of the four states and still has a strong caste system. Pohnpei is the most “western” of the four states, in large part because the national government is located there. In Chuuk, clan relationships are important. In Kosrae, the Congregational Church has a great influence in everyday life.

Music

Traditional music has been passed down through many generations, but local radio most often plays Micronesian pop, which has been influenced by traditional sounds, as well as reggae, modern europop, and American country music. Also, each state tends to have a different style.

Internet

As of December 2008, about 16,000 people in Micronesia had access to the Internet, which accounts for approximately 15% of the population.

Government:

The Federated States of Micronesia is a constitutional confederation in free association with the United States, which means the United States is allowed to operate within the islands and, among other things, deny access to other nations. In exchange, the U.S. provides the islands with defense, economic assistance, and other benefits. The Compact of Free Association went into effect November 3, 1986. An amended version of the compact went into effect in June of 2004.

There are four groups of islands, each group forming a state: Yap, Chuuk, Pohnpei, and Kosrae. The federal capital is Palikir, on Pohnpei.

The government is structured similarly to that of the United States. There are three branches of government: Legislative, Executive, and Judicial. The constitution has a Declaration of Rights similar to the U.S. Bill of Rights. One difference, however, is that most functions of the government in Micronesia are carried out by each of the state governments. Primarily, only defense and foreign affairs are handled by the national government.

Legislative
Micronesia's Congress is unicameral. There are 14 Senators. They consist of one senator from each state who is elected to a four-year term in office and 10 senators who serve two-year terms in office. The state of Chuuk has six senators; Pohnpei has four; Yap has two; and Kosrae has two.

Executive
Congress elects the president and vice-president. Both are chosen from among the Senators who serve four-year terms in office. After those Senators move into the executive offices, special elections are held to fill their vacated seats in Congress. The president and vice-president serve four-year terms in office. The current president is Emanuel Mori. The vice-president is Alik L. Alik.
Judicial
The Federated States of Micronesia has a Supreme Court with three justices from the trial and appellate divisions. Justices are nominated by the president and confirmed by the Congress. Their appointments to the court are for life.

State
The four state governments are structured similarly to the national government with Executive, Legislative, and Judicial branches.

Economy:
Primary industries are fishing, agriculture, tourism, construction, and crafts. The main exports are fish, kava, and betel nut. Export partners include Japan, the United States and several others.

The main imports are food, manufactured goods, and fuel. The main import partner is the United States, but they also receive imports from Japan and other countries. Currency is the U.S. dollar.

http://www.state.gov/r/pa/ei/bgn/1839.htm

Literacy:  The literacy rate is 89%. Slightly more men are literate than women.

http://www.state.gov/r/pa/ei/bgn/1839.htm

Land/Geography:
The Federated States of Micronesia is made up of 607 islands spread out across 2,000 miles of the Pacific Ocean. Some of the islands are tall and mountainous, and some are low atolls made of coral.

The tropical climate is hot and humid. Daily high temperatures are typically no more than 10 degrees above the nighttime lows. The islands receive moderate to abundant rainfall throughout the year, but the wettest season is usually from June to November. Micronesia is on the southern edge of the “typhoon belt,” so the islands are occasionally hit with strong storms.

History
The earliest known settlers of the Caroline Islands of Micronesia arrived there more than 4,000 years ago. Much later, during the 1700s, first Portuguese and then Spanish explorers discovered the islands of Micronesia.

The Spanish ruled the islands until 1899 when control was given to Germany. Later, in 1919, control of the islands was transferred to the Japanese through the Treaty of Versailles. After
World War II, the islands were designated a “trust territory” of the United Nations, administered by the United States.

On May 10, 1979, four of the districts within the “trust territory” formed a new constitution and became the Federated States of Micronesia.

In 1986, the Compact of Free Association with the United States went into effect in the Federated States of Micronesia. This provided the islands with defense, economic assistance, and other benefits from the United States. In exchange, the United States is allowed to operate within the territory and deny access to other nations, among other things. An amended version of the compact went into effect in June of 2004.

On September 17, 1991, the Federated States of Micronesia became part of the United Nations.

Christian History

In 1668, the Catholic Church began working in the Caroline Islands—the islands that are now the Federated States of Micronesia. Protestants started working in the area in 1852. Most of the Protestant denominations were started by Congregationalist missionaries from the United States. Today, the predominant Protestant church is the United Church of Christ.

In the 1890s, on the island of Pohnpei, conflicts between missionaries divided churches along clan lines. Many of those divisions are still present on the island. Catholics generally live on the eastern side of the island; Protestants mostly live on the western side.

Germany had claimed sovereignty over the Micronesian islands in 1885. Later, the American Board of missionaries requested that Germany send Christian missionaries to the islands. In 1906, the Liebenzell Mission started working on the Chuuk (or Truk) islands. By 1914, there were 7 mission stations run by 11 missionaries and 50 people from the local population.

German missionaries were evacuated from the islands during World War I. They returned in 1925, and by 1928 had started a mission on Pohnpei. After World War II, they extended their mission work to the island of Yap.

The four island states have different percentages of Protestants and Catholics. Pohnpei is split half and half between Catholics and Protestants. On Kosrae, 95 percent are Protestants. On the islands of Yap and Chuuk (or Truk), about 40 percent are Protestant, and 60 percent are Catholic. Church attendance is usually high, and churches are considered to be a significant facet of their society.

Most of the immigrants to the Federated States of Micronesia are from the Philippines, and most of them are Catholic.

Missiological Implications

1. Evangelical Christians and churches should recognize the churches in these islands and seek to aid them in guiding more of the church members to deepen religious life. The realization, that in most cases, less than 10% of those who claim Christianity truly are evangelical. This should point to a significant field of evangelism.

2. Evangelical Christians and churches should seek to provide materials and training for local believers for the evangelization of Catholics and others who belong to churches but are not in the evangelical camp.

3. Evangelical Christians and churches should seek opportunities for evangelism in the 607 islands, finding places where churches are needed and finding ways to provide these congregations.
